

Generally Covariant Unified Field Theory - The Geometrization of Physics - Volume VI

By Myron W Evans

Arima Publishing, United Kingdom, 2009. Paperback. Book Condition: New. 236 x 188 mm. Language: English Brand New Book ***** Print on Demand *****.This book is the first to describe a very successful objective unified field theory which emerged in 2003 and which is already mainstream physics - Einstein Cartan Evans (ECE) field theory. The latter completes the well known work of Einstein and Cartan, who from 1925 to 1955 sought to unify field theory in physics with the principles of general relativity. These principles are based on the need for objectivity in natural philosophy, were first suggested by Francis Bacon in the sixteenth century and developed into general relativity in about 1915. In this year, using Riemann geometry, Einstein and Hilbert independently arrived at an objective field equation for gravitation. Since then there have been many attempts to unify the 1915 gravitational theory with the other three fundamental fields: electromagnetism, the weak and strong fields. In this sixth volume ECE theory is established as the only correct theory of natural philosophy at present. The standard model of physics is shown to be erroneous fundamentally in its gravitational and electromagnetic sectors because of its neglect of spacetime torsion. In the papers...

Reviews

Complete guideline! Its this type of great read through. it absolutely was writtern quite perfectly and helpful. I am very happy to explain how this is basically the best book i actually have read through during my personal life and can be he very best book for at any time.

-- **Joshua Gerhold PhD**

A very awesome book with perfect and lucid reasons. It really is basic but shocks within the 50 percent of the book. Its been designed in an exceptionally easy way and is particularly merely right after i finished reading this ebook where in fact changed me, change the way i think.
