RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1890 Excerpt: . . . the time when C will happen; then D happened 7 years ago. Let the student give other illustrations. Imagine that after going 2 steps right and then 7 left, I find myself 10 steps to the left of the origin. Where was I I retrace my steps, going from 10 left, 7 steps right, and then 2 left, and I find myself 5 steps left from the origin. Or again, I notice that I have come upon the whole 5 steps left from the starting point, and retracing these, I get as before a point 5 steps left from the origin. In symbols: $-10 - (2 \cdot 7) = -10 - 2 \cdot 7 = -5$, and $-10 - (2 \cdot 7) = -10 - (-5) = -10 + 5 = -5$ an illustration of association and sign-reversal. Of the latter, here are others: less of westing is more of easting; less of spent is more of saved; to lighten ones burdens is to add to ones strength; taking away cold is making warm. But there are problems where negative numbers are nonsense. A man cannot live a negative number of years. A pond cannot be -4 feet deep. A table cannot have -3 legs. No one is -6 feet tall. 82. If I twice repeat three steps to the right from the origin, I go 6 steps to the right. If I twice repeat 3 steps to the left, I go 6 steps to the left. If I twice retrace 3 steps to the right, I go 6 steps left. If I twice retrace 3 steps...
